

INTEGRATED  
PAIN MANAGEMENT

# If You Suffer From Pain You Are Not Alone.

## Assessment | Treatment | Management

At Integrated Pain Management we collaborate with leading Pain Specialists on the Sunshine Coast, to provide assessment, treatment and management of your pain. Once referred, our Specialist Healthcare Team provides consultation services, advanced diagnostic imaging and our highly trained Radiologists can perform image-guided pain management procedures. These treatments are extremely safe for the relief of your pain, and are particularly effective for arthritis, persistent joint pain and soft tissue inflammation.

### Pain Specialists

At our clinic at Maroochydore, you will be able to access pain assessment services with leading Pain Specialists on the Sunshine Coast. After your consultation, you may be recommended for diagnostic imaging and image guided procedures.

### Image Guidance

During our Image Guided Pain Management procedures our Radiologists use fluoroscopic or ultrasound guidance to inject a fine needle into the affected area. Medications are delivered directly to the source of the pain, and thus are usually much more effective.

### Faster Pain Relief

Pain may be alleviated faster than other traditional methods. Usually you can expect to feel relief within days, with the full effect occurring in a few weeks. Local anaesthetic may also give temporary relief. Treatments may be used to diagnose, treat or deliver pain relief.

### Benefits Over Surgery

Image-guided pain management treatments may delay or eliminate surgical intervention. This provides additional benefits as there are no large incisions to heal and infection rates are significantly lower than with open surgery. It may be a beneficial alternative.

## Do I Need a Referral?

Yes. After receiving a referral from your GP you will be booked in by staff and asked a series of questions. We may also need to see your previous imaging. You can contact our friendly staff on 5430 3955.

## Image-Guided Pain Management

### Am I a candidate for treatment?

You may benefit from our pain management consultation and procedures if you have found only limited relief from typical treatments. We recommend seeing your Doctor for a referral for consultation and treatment at Integrated Pain Management when:

1. You have tried a number of alternatives to relieve your pain without success.
2. Have inflammatory pain, such as joint pain or muscular pain.
3. You have found only limited relief from physiotherapy, massage or other methods.
4. Are currently on a waiting list for surgical procedures, such as a knee or hip replacement.
5. Have pain that does not seem to subside and would like a consultation.
